

HOW TO USE THE EASY INSTALLATION TOOL IN **3 SIMPLE STEPS?**

In 2012, this tool transformed traditional cedar shingles installation methods by simplifying the installer's workload.

Snapping chalk lines then having to clean them, installing temporary boards leaving marks and figuring the exposure row after row: this has become part of the past!

INSTALLING YOUR CEDAR SHINGLES : IT'S JUST AS EASY AS 1-2-3!

Before starting, carefully read the SBC *Cedar Shingles Installation Guide*.

STEP 1

Slide the Easy Installation Tools retention legs up and behind previous course (*see Figure 1*). Make sure the tool stop is tight against the butt edge of the shingle. To do so, simply tap under the tool with a hammer.

figure 1

STEP 2

Choose a straight ledger board, 3/4 inches thick, previously cut to the width of your exposure. Insert it into the installation tools, taking care not to dislodge them (*see Figure 2*).

figure 2

STEP 3

Install the cedar shingles by placing them on top of the ledger board while following the SBC cedar shingle installation instructions. Once the shingles have been nailed or stapled, remove the board and the tools, then return to step 1 (*see Figure 3*).

TIPS

Before installing a new course, check your level and adjust the exposure using the adjustment scale built into each tool. Make sure the rows are parallel several times using a laser or a level.

Your tool does not hold in place? Each retention leg has a retaining notch. Take a tool, such as a screwdriver, and pop out the notch. It will hold tighter to the shingle. If you have a hard time getting it out, use a hammer to flatten the notch.

HOW TO USE THE EASY INSTALLATION TOOL IN **3 SIMPLE STEPS?**

TOOL PARTS:

TECHNICAL SPECIFICATIONS

Tool size: 6 1/2" x 1 1/2"
sold in packages of 2

Box size:
19 1/2" x 13 1/2" x 8 1/2"
(include 24 sets of tools)

For any questions regarding the use of the installation tool,
contact our technical department at **1-888 594-1112 ext. 120**. To order, click [here](#).
