

## Technical Sheet

# WOOD FIBER FOR PLAYGROUND SURFACE

Our wood fiber for playground surface is a natural product made of 100% cedar which contains no additives, contaminants and chemicals. Made from fresh wood, recently debarked and free from dirt, leaves, twigs or other pollutants, these organic materials accelerate the decomposition. 100% cedar wood is grinded and screened to the desired particle size to obtain a fibrous and uniform texture to ensure safety in case of fall. The absorption capacity of the wood fiber for SBC playing surface is comparable to similar products on the market.

**100% cedar**

Particule size	Minimum	Maximum
3/4"	99%	100%
3/8"	75%	100%
No. 16	0%	15%

**Origin of cedar: Quebec, New Brunswick, Maine (USA)**
