

SHIMS & UNDERCOURSE SHINGLES

1- Product Description :

White cedar is a noble wood species and at SBC, we deeply respect its value. This is why we use every aspect of it. What can't be used for cedar shingles is transformed, in part, into shims and undercourse shingles. Our quality commitment also applies to these products, and we make sure they meet out strict manufacturing standards. Our 100% cedar shims and undercourse shingles are stored in our warehouses, keeping them fresh and protected from the elements.
