The SBC advantages

Cedar shingles from one generation to another

As a family business, the word *Home* has a strong meaning. *Home* is where people's stories begin. *Home* is a place to gather with family members or friends. *Home* also means pride and family heritage.

That's why your home deserves the best-quality siding — the kind that will last for generations. For over 25 years, quality has been SBC's top priority. Our team of experts has been continuously innovating and developing cutting-edge equipment to make it all happen. As a result, SBC's factory-finished cedar shingles will provide years of timeless distinction to your project.

Truest R&R shingles on the market

R&R precision 1/64" up to 10" from the butt

15% wider than industry standard

A minimum width of 3-7/16"

Reversible shingles

Graded on both sides

Optimal wood stability

Kiln-dried by dehumidification, producing less brittle shingles

Durable finish

Exclusive factory-finished dipping process putting more stain below the 5" exposure line

Valuable time-saver features

Embossed nailing line on every shingle, installation tool and touch-up kits

PPG Machinecoat®

100% acrylic stain

Life in color with PPG

Our winning recipe combines high-quality coatings with the industry's best finishing methods, allowing us to offer reliable factory-finished cedar shingles with exceptional durability.

In 2001, we teamed up with PPG, a creator and global leader of machine applied coatings. Their solid color MACHINECOAT® products are specially formulated for machine application and are best known for providing excellent adhesion, flexibility and durability. With PPG's finishes and colors, there's almost no limit to your imagination.

Working with PPG and drawing upon four generations of shingle-making experience, we co-developed our proprietary dehumidification drying system, which optimizes wood stability and coating adhesion. Our partnership also yielded a very unique dipping process, putting more coating on the exposed surface. Hence, we are proud to offer the industry's best warranty* program. With SBC and PPG, your investment is fully protected for years to come.

SBC Cedar shingle samples in a click

Choosing your siding color is an important step in a home project. At SBC, we like to make things easy. Simply go to SBCcedar.com/samples and follow the steps to order up to three free samples, which will be delivered promptly. If you need help, you can always chat directly with a member of our team.

Are you looking for more options?
We have you in mind!

Personalize any project thanks to the SBC's custom-color service. Just provide us with the manufacturer's name, color name and number, and place your sample order on sbccedar.com/samples/solid-custom. You can count on our experts to find your perfect match.

SBC grading system: The future is now!

The cedar shingle industry uses a grading system to determine the quality of the wood. The two premier grades for siding are *Extra "A"*, which has no imperfections, and *Clear "B"*, which has no imperfections on the exposed surface.

With our industry facing challenging log-size reductions and labor shortages, SBC has developed a revolutionary blend of both premier grades to create our exclusive *Sidewall Select* shingles.

These unique shingles enable us to shorten lead time and offer a wider range of stock colors — all without compromising quality or warranties. Learn more at SBCcedar.com in the **Info SBC** section.

No exposed imperfections

Wider for faster installation and better look

Graded on both faces
